CAPABILITY STATEMENT

CASA-Certified Drone Training, Inspections & Compliance

Real operators. Real mine sites. Real capability.

PREPARED FOR Resource & Industry Partners	PREPARED BY FlyIQ by DIWA — Perth, WA	CONTACT flyiq@diwauav.com.au
---	---	--

WHO WE ARE

FlyIQ by DIWA is the training and capability-development arm of Drone Inspections WA Pty Ltd (DIWA Group) — a veteran-owned, Australian-owned commercial drone operator established in 2016. For 10 years, DIWA has delivered aerial inspections, mapping, surveying and compliance services on active mine sites, industrial assets and critical infrastructure across Western Australia and nationally.

That distinction matters: FlyIQ is not a standalone training provider working from a manual. Every instructor is an active DIWA field operator who flies commercial inspection, survey and mapping missions on real sites every week. Trainees learn the regulations and the realities of the job — weather calls, site safety protocols, client expectations and equipment limitations — from people who do the work, not people who once did.

This capability statement outlines FlyIQ's full training and compliance offering, delivered under the CASA Remote Operator's Certificate (ReOC 1174) held by DIWA, and the broader DIWA Group capability in mine-site inspections, mapping and UAV compliance consultancy that underpins it.

Why Organisations Choose FlyIQ by DIWA

- ✓ Training delivered by working commercial drone operators — not full-time trainers reading from a manual
- ✓ Backed by a 10-year operating track record in mining, utilities, infrastructure, environmental and defence sectors
- ✓ CASA-approved ReOC (1174) with proven safety and compliance oversight, including for government departments
- ✓ CM3 certified contractor — recognised for pre-qualification on major resource and infrastructure projects
- ✓ Flexible delivery: Perth-based training or full on-site delivery at your mine site or facility, anywhere in Australia
- ✓ End-to-end capability — licensing, advanced endorsements, Safety Management Systems and ongoing CASA compliance support, all under one group

TRAINING CAPABILITY

FlyIQ delivers CASA-approved drone training across the full pilot journey — from first licence through to advanced beyond-visual-line-of-sight operations and organisational compliance oversight. All courses meet CASA's Part 101 Manual of Standards (MOS) and can be delivered at our Perth training facility or fully on-site at client locations, including active mine sites.

Foundational Licensing

Course	Description	Delivery
Initial RePL + AROC + MR25e	Best-value combined pathway: Remote Pilot Licence, radio operator certificate and 25kg multirotor endorsement in one program.	Instructor-led
Initial RePL (Multirotor, <25kg)	Core commercial licence covering airspace, regulations and hands-on flight training for broad commercial flexibility.	Instructor-led
Initial RePL (Multirotor, <7kg)	Entry-level licence for pilots starting commercial work with lighter aircraft.	Instructor-led
7kg to 25kg RePL Upgrade	Upgrades existing licence to unlock larger commercial platforms used across mining and industry.	Instructor-led
AROC (Aeronautical Radio Operator Certificate)	Required certification for operating in controlled airspace and communicating with air traffic.	Online

Advanced Operations

Course	Description	Delivery
Medium Category RePL (25kg–150kg)	Operate larger commercial drones for industrial, agricultural and specialised operations.	Instructor-led
EVLOS (Extended Visual Line of Sight)	Operate beyond the pilot's direct line of sight with trained visual observer support.	In-person only
BVLOS / OCTA Exam Preparation	Preparation for the CASA PEXO exam and beyond-visual-line-of-sight capability.	In-person or online
Chief Remote Pilot (CRP) Training	For pilots moving into oversight, compliance and operational leadership roles.	Instructor-led
Remote Operator's Certificate (ReOC) Support	Certification pathway for organisations needing to legally conduct commercial drone operations.	Consultative

Team & Organisational Packages

- **Team RePL Package** — Coordinated licensing pathways for multiple staff building an in-house commercial drone capability.
- **Operational Upskilling Package** — Endorsements, heavier-aircraft training and role-based development for existing licensed pilots or operational teams.
- **Tailored Organisational Package** — Custom training pathways built around a specific site, workforce and operational requirement, including staged on-site delivery.

COMPLIANCE & SAFETY CAPABILITY

Training is only half of the capability major resource and infrastructure organisations need from a drone partner. FlyIQ and DIWA Group provide the compliance infrastructure that sits behind safe, auditable commercial drone operations — from certification through to ongoing oversight.

Certifications & Accreditations

- ✓ CASA Remote Operator's Certificate — ReOC 1174 (Drone Inspections WA Pty Ltd)
- ✓ CM3 Certified Contractor — recognised for pre-qualification on major resource and infrastructure projects
- ✓ All pilots and sensor operators are CASA-licensed and certified
- ✓ Proven compliance record managing and providing operational oversight to government departments
- ✓ Veteran-owned, Australian-owned and operated business, established 2016

Compliance & Consultancy Services

- **Safety Management Systems (SMS)** — Standard Operating Procedure manuals, developed and implemented to CASA requirements for client operations.
- **CASA Approvals & Permissions** — Assistance securing and maintaining CASA Remote Operator's Certificates, including documentation and safety cases.
- **Audits & Incident Investigations** — RPAS operational audits and post-incident investigations, benchmarked to industry standards.
- **Operational Leadership Support** — Crew Resource Management (CRM) training and Chief Remote Pilot services for organisations building internal RPAS capability.
- **Aviation Consulting** — Ongoing guidance integrating new UAV technologies and expanded operations into Australian airspace.

DIWA GROUP — WIDER FIELD CAPABILITY

Because FlyIQ sits inside an active operating business, training is grounded in live commercial work. DIWA Group delivers the following services directly to mining, utilities, infrastructure, environmental and defence clients across Australia — the same operational environment our trainees are prepared for.

Service	Capability
Asset Inspection	Powerline, pipeline, wind turbine, confined-space and offshore structure inspections for mining, utilities and industrial assets.
LiDAR & Mapping	Corridor mapping, volumetrics, terrain modelling and vegetation analysis for engineering, mining and infrastructure.
Multispectral Imaging	NDVI/NDRE mapping, crop health, soil assessment and canopy stress detection for agriculture and environmental management.
Environmental & GPR Surveys	Habitat and erosion monitoring, carbon offset studies, and airborne/ground-based ground-penetrating radar for buried infrastructure and geological features.
Bespoke & Defence Projects	Remote pilot outsourcing, heavy-lift operations, confined-space and SAR platforms, R&D and systems integration.

Sectors Supported

Mining • Utilities • Construction • Infrastructure • Environmental Management • Telecommunications • Government • Defence

DELIVERY FOR RESOURCE SECTOR PARTNERS

FlyIQ is structured to deliver training on your terms — at our Perth facility, or fully on-site at operating mine sites and remote locations. Instructors bring current site-safety awareness from DIWA's own field operations, reducing the induction and onboarding burden for host sites.

On-Site & Remote Delivery

- ✓ Full course delivery at client sites, including active mine sites, across Western Australia and nationally
- ✓ Instructors experienced in site inductions, journey management and mine-site safety protocols
- ✓ Group and individual pathways scheduled around operational shift patterns
- ✓ Coordinated multi-course scheduling for large workforce rollouts

Perth Training Facility

- ✓ Practical, small-group instruction with real commercial aircraft — not simulators or generic online modules
- ✓ Head office and training base: Level 28, 140 St Georges Terrace, Perth WA 6000

LET'S TALK CAPABILITY

We'd welcome the opportunity to discuss training and compliance capability for your operations.
